DETAILED ACTION

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1648.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-30, drawn to method of screening an agent for activity in modulating T lymphocytes function.

Group II, claim(s) 31-33, drawn to method of screening an agent for activity in modulating T lymphocytes function, wherein cells are infected with HSV.

Group III, claim(s) 34, drawn to method for blocking suppression of cytotoxic T cell activity.

Group IV, claim(s) 35, drawn to method of suppressing cytotoxic T cell activity against target antigen.

Group V, claim(s) 36, drawn to method of screening an agent for activity in suppressing T lymphocyte function.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I is known in the prior art as evidenced by Munger et al (US 2003/0171279 A1, 09/11/2003) wherein the reference teaches a method of screening an agent for activity of T lymphocytes wherein a cell expressing a HSV Us3 polypeptide (see all the claims, especially claims 50-71). The cited evidence proves that the

Art Unit: 1648

technical feature of Group I does not make a contribution over the prior art. Thus, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
